DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-14 and 24-31 drawn to encoding and decoding signal with data rate conversion, classified in class 341, subclass 061.

II. Claims 15-23, drawn to memory interface, classified in class 365, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are one is coding data and one is memory interface.

Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

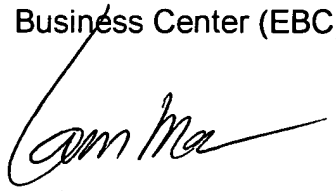

Affirmation of this election must be made by applicant in replying to this Office action as required under 35 U.S.C. 121.
